For the Inuit tribe, Sedna is the 'Immortal Goddess of the Sea', the 'Goddess of the Frozen Waters' and the 'Life/ Death/ Life Goddess'. She represents the watery depths of our unconscious, and her journey from this underworld to the surface holds the key to Life and Death. Her message to the world is the emergence from victimisation into a place of being honoured as a giver and sustainer of life. All of us harbour wounds, unconscious pains, distant memories and betrayals; they remain frozen and buried deep within us. Being unconscious and underwater, they are unresolved and held as an internalised rage. Emotionally we cut off this part to survive the trauma; as Sedna's hands were cut off, disabling her. Life is harsh, but by accepting and overcoming your personal issues with self-respect and compassion, you become both tougher and more humane. How you feel, and what you choose to do, is within you. You can be caught in the web of a victim, or you can let go and break free. In this work, the real 'Work', is to keep your heart open.

Sedna symbolises the tough or unpleasant choices you face, here it is important to be in your power and authority, with self-respect and great compassion, to voice and express your deepest most hidden needs.

### Vesta

'I am the vessel of pure devotion'

Vesta is the 'Goddess of the Hearth' and the 'Keeper of the Sacred and Perpetual Flame'. She is the brightest of the asteroids in the sky, a symbol of Fire and also a symbol of purity in her devotion, and in her sexual expression. Motivated always by goodness she exudes warmth and dedication. So gather her pure energy around you to commit and devote yourself to something beyond, and larger than, yourself. Connect to your own spiritual truth and focus on the personal causes that call to you; and from this place, by standing and work independently, you express your Soul.

Vesta symbolises devotion and dedication for your Life work. Stay true and connected to your natural tantric instincts, to express your pure purpose.

The Symbolism of the Elements of our Universe

Fire Element

The Fire element warms your heart and hearth, and its strong bright light draws people to your active Life-giving spirit. This passionate, hot and temperamental energy acts on impulse, but its unpredictable element may quickly burn, consume or destroy if out of control. When your Fire element is properly channelled it becomes a dynamic, creative, inspirational, enthusiastic and fun-loving energy force that does not stop until you get what you want.

The Fire Element symbolises spontaneous, assertive and creative expression. Use joy and enthusiasm to initiate control and with this dynamic forceful energy, burn away the obstacles.

### **Earth Element**

The Earth element embodies our spirit, and grounds us; its solid, cautious and dependable energy provides stability. The survival instincts are strong here, keeping us safe, nourished and able to care for our physical needs. This is pragmatic long-range planning, and not flexible or spontaneous; but if too rigid, if unmovable, it can block us like a rock. This practical element supports our life on this planet, so with care and determination we can plant our seeds of vision in the earth and patiently watch them grow.

The Earth Element symbolises the real, tangible and tactile aspects of life, the things you can see, touch, hear, taste or smell; where you work with tenacity, to take care of those mundane or daily chores, and to complete those longer projects.

### Air Element

The Air element is the very breath of life that we all share together, and it is the essence of all thought and mental development. Although Air is unseen and untouchable, it is everywhere connecting us all. A connection that floats happily, moving within everything. Always changing, ideas seem to materialize out of thin air. When the air element is out of control it is a whirlwind, throwing all in its path, or else it is up in the clouds with no connection to reality. When properly channelled it is your expansive, interconnecting and interweaving self expression.

The Air Element symbolises movement and interconnection, unseen communication and shared potential through networking, curiosity and conceptual tasks.

### **Water Element**

The force of water can dissolve all boundaries and structures, flowing until it takes the shape of a container; it wants to engulf everything and cover everywhere, absorbing all the energies around. The Water element runs through our body as you are composed 70% of water. This is your fluid feeling quality, the mysterious emotional depth of your responses and reactions to life; from your peaceful pool, boiling and steaming pot, forgotten frozen icicles, roaring waves, torrential storms and to your bubbling brook. Water is the womb of creation, and allows you to flow down deep, and search out the emotions of the human psyche.

The Water Element symbolises emotional connection with Life; allowing empathy, intuition and sensitivity to merge with, and understand, one another.

# A Symbolism of the Karmic Journey

## The North Node

The North Node is known as the Dragon's Head and represents your future, or the path in front of you that needs to be developed. As the Head, it is the feeding and nurturing part; this supports and guides you forward as you move away from your outdated behaviours. It represents the direction in which your life is heading, the lessons you are learning through this, and the methods to enhance your personal development. This is your own unique complex spiritual destiny. To achieve your evolutionary purpose, acting and flowing according to fate and the Divine Will, requires risks.

The North Node symbolises the Karmic complexity of your personal evolutionary forward movement..

# The South Node

The South Node is called the Dragon's Tail, it symbolizes your past, and the lessons from your past; or past and ancestral lives, that have been carried forward into this present time. As the Tail, it is where you need to give yourself out into life by symbolically feeding others. You often revert back to past habitual behaviour, especially in times of insecurity, for these old and familiar patterns can appear to be safe. This backward movement will inhibit your growth and block you reaching your rightful destiny, but also held within these deeply instinctual and imbedded habits, there are wisdoms and talents that are useful gems for you to use. By accepting the evolution of new experiences you awaken soul memories.

The South Node symbolises the easier path of least resistance, our old instinctual habit patterns and outdated stories that have shaped us and which we can so easily become attached to.

With Thanks to Elizabeth Keller for her encouragement and in-put in the writing of this.
